How do you reset the toner on a brother intellifax 2840

If you just replaced your Brother dr-420 drum, but your fax is still displaying to replace it, follow these easy steps to reset it: Make sure that the machine is turned on Open the front cover Press Clear Press 1 to reset the drum counter When the LCD shows Accepted, close the front cover If you would like to purchase Brother tn-450 toner or Brother dr-420 drum or if you have any questions, please give us a call at 760-431-3756 Monday – Friday 9am – 5pm pacific time. Sometimes when replacing a Brother toner cartridge or compatible Brother toner cartridge your printer will continue to show a warning message on the printer such as 'toner low' or 'replace toner'. In this article you will find out how to reset the Brother printer toner counter to continue printing. What is the Toner Counter on a Brother Printer? Toner counters are a general guesstimations on a printer, which tell the printer when a toner needs replacing. Some laserjet printers are unable to read the toner itself and rely on the page counter being reset, which happens when a new toner is inserted in the machine. Sometimes the printer doesn't reset the toner and can therefore show an inaccurate toner level for what is in the cartridge. Brother toners don't have the ability to read the toner and therefore if the toner hasn't been reset by the user are unable to provide an accurate toner level. If the Brother printer doesn't recognise the cartridge as new, the printer will display an error. This can be down to the chip recognition or incorrect installation of the toner. In certain cases of using a Brother toner an error might occur before the actual toner cartridge has ran out. The Brother printer will display the message "replace toner" or similar. But the toner will still look new on inspection. This can happen if the toner wasn't reset on the counter on the new installation of the cartridge or the small number of documents printed exceed the page counter guesstimations on the printer which are built in. To solve this error a simple reset procedure on your printer will ignore the message and allow you to continue printing. The best way to see if there are any errors or, if you think the toner needs replacing, is print a black and white test page or a colour test page. This will show if your toner is low or have a deterioration in quality. The colour test page print out will then advise which toner(s) need replacing. The best way to do this is on installation of your new Brother toner(s) print out a black and white test page or colour test page. This will show the new quality of the toners that are full. Print out another test page to see if you need to think about replacing your toner. Remember all Brother toner print yields are based on 5% average coverage. How do I reset the counter on my Brother printer? Follow the steps below for various series of printers. Your instructions will vary dependant on the series of your Brother printer. These instructions will reset your printer counter and allow you to continue printing. How to Reset a Toner for Brother DCP Printers Open the front cover of the printer. The printer should now show "replace toner" or "replace drum". Then press the up or down button. When 00 appears on the printer display, press OK and close the front cover. The warning message should now be clear. Printing will be able to continue. How to Reset a Toner for Brother HL Printers Open the front cover and remove toner & drum from the printer. Press the START button. Install the toner & drum back into the printer. Press the START button twice and close the front cover. The warning message should now be clear. Printing will be able to continue. How to Reset a Toner for Brother MFC Printers Open the front cover of the printer and press the CLEAR / BACK button. Press the following buttons on the keypad in this sequence, *, 0 and finally 0. Close the front cover. The warning message should now be clear. Printing will be able to continue. These different methods should clear you Brother printer counter and allow you to start or continue printing as normal. For any further advise on Internet-Ink premium Brother toners, please don't hesitate to get in touch via the contact form. If you are still getting "toner low", "replace toner", "toner ended" or a flashing light on the Brother printer. Do some of the following simple checks: Check you have the correct toner for your printer? Make sure you have the correct number on the toner for your machine. Also check that you have a toner or a drum for the right item that you have ordered. For most Brother printers the toner cartridge is in the drum unit. You may need to replace one or the other or both. Check you have installed the toner correctly Do a simple check to install the toners correctly in the printer. Make sure the toner is correctly sitting in the drum unit and that the drum unit is seated correctly in the printer. A simple reset is open cover the printer and turn off the printer. Remove all the Brother toner cartridges out of the printer. Wipe and check the chips to see if they are all correct on the toner and haven't been dislodged. Give the printer a quick wipe and clean with a lint free or dust free cloth. Then reinstall the toner cartridges in order with the black cartridge last. Turn your printer back on. Clean the Corona Wire on the Brother Printer The corona wire can become dirty with toner powder or general use. It can be cleaned simply by sliding the tab gently back and forth and can be wiped with a dust free cloth. Make sure the drum unit or the toner is also clean. Toner dust and powder can accumulate on Brother laser printers if they are not maintained on a regular basis. This is simple to do and can save money by increasing the life span of your printer. Just general checks for dust and toner powder and general cleaning of all the drums and toners, alongside the housing units they sit in. Further cleaning can be done by checking the fuser, rollers and waste toner collector, with some machines you may find powder accumulation on the transfer belt. In order to maintain the quality of your printouts on your Brother printer these should be normal maintenance tasks, which can be done inhouse. Internet-ink are #1 for compatible Brother toners in the UK. All our toners are checked and tested to make sure they are the highest standard of toner for your machine. All our toners come with a 1-year guarantee and free UK delivery. We also offer an all round support team to help you install and use the printer to get the best out of your cartridges and save money in the long term. So you've just replaced your Brother toner cartridge in your printer and the 'toner low' or 'replace toner' warning keeps popping up. You've tried everything. You've taken the toner cartridge out and checked everything is working and all the packaging has been removed. You've shaken the cartridge from side to side. You've even switched the printer on and off and nothing is making that irritating little message go away. There's nothing in the user manual to tell you what to do. And worst of all, even though you know the toner cartridge is new, the printer still won't let you print! Relax. Most Brother toner printers need to be told you've replaced the toner cartridge. You'll have to manually reset the counter and, luckily, this is fairly easy to do. We've put together a handy list of Brother toner printers and how to reset the toner count on them. To reset the 'Toner Life End' / 'Replace Toner' message on Brother HL monochrome (black and white) printers: Open the front cover and leave it open while completing the following steps. Turn the printer off. Hold the 'go' button (or 'start' button) while turning the printer on. All panel lights should be on. Release the 'go' button (or 'start' button). Press the 'go' button (or 'start' button) 2 times. Pause. All panel lights should be on. Press the 'go' button (or 'start' button) 5 times. The toner light should be off (the error may be flashing). The paper light should be on or flashing. Close cover. The ready light should be the only light on. To reset the 'Toner Life End' / 'Replace Toner' message on Brother MFC monochrome (black and white) printers: Open the door and press the Clear/Back key Press *00 Press OK Do not choose anything for drum replacement. When the drum replacement menu comes up, press * and then 00, then press OK. To reset the 'Toner Life End' / 'Replace Toner' message on Brother DCP, MFC and HL colour printers: With the printer powered on, open the toner access door. (You will see a 'Cover is Open' message on the LCD screen.) Press the 'Clear/Back' button to get to the 'Reset Menu' At the Reset Menu you can then scroll through the reset options for your printer's toner cartridges. You will get reset options for all four colours (BK, C, Y, M). If your printer takes high yield and standard yield cartridges, there will be an option to reset either one. Select the proper size and the colour of the toner cartridge you want to reset, then press OK. Each cartridge must be reset individually. Press '1' to reset. Press 'Clear/Back' to get out of the menu, then close the door. That's all there is to it. It really is that simple. If you do get stuck or have any problems, you can always contact us.
